PREFACE

This Parts Catalog contains listings and illustrations of the Field Replaceable Units (FRUs) that IBM Instruments, Inc. customer engineers will use in servicing the NR/80 Series of Nuclear Magnetic Resonance (NMR) Spectrometers.

Contents

This book consists of 4 chapters:

- Chapter 1, "Introduction," identifies the major components comprising the NR/80 NMR Spectrometer.
- Chapter 2, "Parts Identification and Listings," photographically identifies and lists the FRUs.
- Chapter 3, "Numerical Listing," lists the parts in numerical order
- Chapter 4, "Alphabetical Listing," lists the parts in alphabetical order

How To Use This Book

To locate or identify a Field Replaceable Unit of the NR/80, Customer Engineers can use either the Numerical Listing, the Alphabetical listing, the Table of Contents, or some combination of these cataloging tools. Locating parts is done by:

1. If you know the identifying number of a FRU and want to find out more about its placement or description:
 - a. Scan the "Numerical Listing" for the part number. Copy the Figure ID in which the part is illustrated, and the view number that is used to locate the part in that figure.
 - b. The Figure ID is in the form "1-n, 2-n, etc." The number before the dash appears in the Table of Contents, in "Chapter 2, "Parts Identification and Listings." Go the appropriately numbered section in Chapter 2 to locate the part. For example, if the Figure ID is 7-12, go to section 2.7 in Chapter 2 to search for the part.

- c. On the accompanying list (opposite the Figure), find the Description of the part, and the quantity used.
2. If you know the name of the assembly (or subassembly) in which a part is located:
 - a. Turn to the Table of Contents. Find the page number on which the assembly or subassembly is found. Note the page number. Open the Parts Catalog to the specified page.
 - b. Find the FRU in the illustration. Copy down the FRU Figure ID from the drawing.
 - c. Use this combined Figure ID to locate the Part Number, Part Description, and Quantity in the list on the accompanying page.
3. If you know the location of the assembly in which a part is found:
 - a. Turn to the Major Assemblies graphic. The basic geography of the instrument is shown here. Copy the name of the assembly in which your part is found, and turn to the Table of Contents.
 - b. Find the page number on which the assembly or subassembly is found. Copy this page number down. Turn to the specified page.
 - c. Find the FRU in the Figure. Copy down the Figure ID of the FRU from the illustration.
 - d. Use the combined Figure ID to locate the desired part information in the table on the accompanying page.

- Console Power Supply
- AC Panel
- Console Frame
- Display Panel
- Homo-Hetero Decoupler
- Pulse Transmitter
- Diskette Drive
- X-Y Recorder
- Main Stabilizer and Magnet Power
- Processor
- Magnet Assembly
- Heat Exchanger
- Variable Temperature Controller
- Miscellaneous Parts

2.0 PARTS IDENTIFICATION AND LISTINGS

This section contains a series of photographs, called "Views," that identify the FRUs in the assemblies or subassemblies, and and catalog listing for the parts. The catalog listing for the part contains:

- Figure ID and View, which identifies the part on the Views.
- Part Number, which is the IBM Instruments, Inc. part number assigned to that particular part.
- Part Description, which briefly states the purpose of the part.
- Quantity, which lists how many of those particular parts are required in the assembly or subassembly.
- Supplier, which identifies the manufacturer of the part.
- Supplier Catalog Number, which identifier the manufacturer's part number of that particular part.

In some instances, there are no photographs of a particular part. In this case, an asterisk is used in place of a View number.
